

Do you have problems controlling
your fleet maintenance?

AMTRAX FLEET MANAGEMENT SYSTEM

This is a simple to use system designed to assist Transport & Fleet Managers in providing comprehensive history & cost analysis reporting, as well as planning the servicing of their fleets to both minimise vehicle downtime and maximise workshop utilization.

5 Main benefits:

1. **Precise control** - no more over-servicing which wastes \$\$\$
2. **Vehicle History reports** – required by the LTNZ/SCIU in the event of an accident
3. **Avoid missed COF & RUC renewals**
4. **Prevent missed Services**
5. **Better tracking of warranty claims**

10 Supplementary benefits:

1. **Vehicle Detail File**, one stop shop for all information such as VIN, Chassis and Serial numbers; warranty details, fuel card & PIN#, financial details and more.
2. **Service Forecasting** by individual vehicle, or by cost centre, or fleet, either at the present time, or at a pre-determined time in the future.
3. **Problem Log**, with quick access function, to record drivers' complaints plus any notes on vehicle servicing requirements. Automatically displayed on creating a Workshop Job Order.
4. **Workshop Job Order generation**. After selection of the appropriate servicing and repairs to be done, a Job Order is printed or emailed to the workshop.
5. **Better control of RUC purchasing**, including calculation of pre-paid \$value.
6. **Substantially reduces paperwork & through automated procedures** – especially when interfaced with GPS system or Fuel cards to update hubo readings automatically.
7. **Reduced vehicle repair frequency** means reduced vehicle downtime
8. **More efficient workshop administration & utilisation.**
9. **Optimisation of service intervals** gives improved cost control.
10. **Better comparison of equipment costs** provided Better information base on which to determine future vehicle acquisitions

Technical

Web based, written in industry standard .NET & SQL, easily modified to meet your exact requirements.
